

Pipes and Precipitation District 65 water study

District 65 won a DNR Coastal Management Grant to enhance the water units among 3rd and 6th graders!

This program is a collaboration among D 65, the City of Evanston Utilities Department, The Alliance for the Great Lakes and LakeDance. Throughout the year, 1500 students will spend time outside exploring the water cycle in a relevant way: in their schoolyards! Based on City water and sanitation maps, expert engineers, experienced classroom, guest teachers and artists, we anticipate a year of experience, inquiry, rainy field trips, and art making.
